-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 is indefinite because it is unclear if the “support wall forming body” is the same element as the “shaft support wall forming body,” of claim 1.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Matsufuji (US 6,360,623), as best understood.

Matsufuji discloses a tractor forming a transmission casing by communicably connecting a plurality of cylindrical casings (1, 2, 3) in the fore-and-aft direction, being characterized in that a shaft-support-wall forming body (5) is detachably mounted on an

inner peripheral portion of an end portion of one cylindrical casing (1), and end surfaces of the cylindrical casings are brought into face contact with each other and are connected with each other without interposing the shaft-support-wall forming body therebetween (see Fig 1).

Re claim 2, the transmission casing is formed by communicably connecting a main transmission casing (1) which constitutes a cylindrical casing in which a main transmission mechanism is incorporated and a sub transmission casing (2) which constitutes a cylindrical casing in which a sub transmission mechanism is incorporated in the fore-and-aft direction, a support-wall forming body (5) is detachably mounted on an inner peripheral portion of the rear end portion of the main transmission casing (see Fig 1), and a rear end surface of the main transmission casing is brought into face contact with and are connected with a front end surface of the sub transmission casing without interposing the shaft support wall forming body (see Fig 1).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
